

# GIRI CHARAN M

## Backend Developer

+91 89250 59023 | mgiricharan@gmail.com | linkedin.com/in/msgiri-23nov2001 | Trichy, Tamil Nadu, India

### SUMMARY

Backend Developer with 1.7+ years of experience building and maintaining robust RESTful APIs using Node.js, Express.js, and MySQL. Skilled in relational schema design, multi-table joins, and SQL query optimization. Experienced in translating business requirements into clean backend logic and collaborating closely with frontend teams for seamless API integration. Eager to contribute to scalable, high-performance backend systems.

### EXPERIENCE

#### Backend Developer (Node.js)

##### Bharat Clouds Private Limited

09/2024 - Present • Trichy, India

- Developed and maintained backend services for iFillip, an AI-powered school-management SaaS.
- Built academic performance analytics APIs aggregating engagement data from multi-thousand-row tables.
- Designed an exam Class Performance Heatmap API joining 8+ tables with pagination and rank-based sorting.
- Optimized MySQL queries, reducing API response times for class-strength endpoints.
- Refactored controllers using clean model/controller separation for easier testing and maintenance.
- Implemented reusable utilities for paginated responses and risk-bucket filtering.
- Migrated legacy PHP modules into the Node.js + Express stack.
- Built backend modules for Anna IAS Academy including student management and exam result publishing.
- Collaborated with clients on API contracts and supported the React frontend team.

#### Frontend Developer Intern

##### Internship Program

11/2023 - 02/2024 • New Delhi, India

- Built responsive web pages and UI components using HTML5, CSS3, Bootstrap, and vanilla JavaScript.
- Developed React.js mini-projects featuring API integration and form validation.
- Strengthened fundamentals in component-based architecture and state lifting.

### EDUCATION

#### Master of Science (M.Sc) in Computer Science

##### Tiruchirappalli, Tamil Nadu, India

Completed

### KEY ACHIEVEMENTS

#### API Optimization & Development

Developed and optimized APIs that significantly reduced server response times and improved overall system efficiency.

### SKILLS

Node.js • Express.js • REST API Design • MySQL • SQL • JavaScript (ES6+) • React.js • JWT • Middleware • MVC • Git & GitHub • Postman • VS Code • npm • Agile/Scrum

### TRAINING / COURSES

#### Frontend & Backend Development Internship

Completed React.js + JavaScript track during an internship focused on frontend and backend development.

### PROJECTS

#### iFillip

Present

AI-powered School Management SaaS offering academic, attendance, and analytics functionality.

- Contributed backend modules for academic analytics, attendance tracking, and student ranking.
- Implemented health-score computation and surfaced results through dashboards.

#### Anna IAS Academy (AIASA)

Present

Backend APIs for student enrollment, exam scheduling, and result publishing.

- Built backend APIs supporting the student lifecycle in the coaching institute.
